

I respectfully ask you to reject NAB petition 04-160. XM Radio provides the content and quality of programming that is sorely missing from traditional broadcast radio/television. I should not be forced to gather my local information (i.e. news/weather/traffic) from any source other than one of my own choosing, at my own convenience. If we as free thinking Americans don't cave-in to their ridiculous demands than maybe local broadcasters will finally be forced to raise their standards to the level that XM Radio has achieved!
